

ACRYFILL RIT 809

CHEMICAL COMPOSITION

Water dispersion of polyurethane

CHARACTERISTICS

<i>Appearance:</i>	<i>white liquid</i>
<i>pH in solution at 10%:</i>	<i>7 - 8</i>
<i>Ionic Charge:</i>	<i>anionic</i>

PROPERTIES

ACRIFILL RIT 809 is a water dispersion of aromatic polyurethane and it forms very sticky films.

It has excellent adhesion features and very good cold resistance.

ACRYFILL RIT 809 is very suitable in base coat solutions for soft articles as nappa and garment, or as additive to soften the resins solution, in order to increase cold crack and flex resistance.
