

ACRYFILL SOFT 42

CHEMICAL COMPOSITION

Silicon dissolved in solvent

CHARACTERISTICS

<i>Appearance:</i>	<i>transparent liquid, slightly yellowish</i>
<i>Active substance:</i>	<i>About 12%</i>
<i>Flash point:</i>	<i>16°C</i>

PROPERTIES

ACRIFILL SOFT 42 is a silicon based touch modifier, dilutable in solvent, frequently used in normal fixatives.

The characteristics are: natural touch, warm, slippery.

USE

We suggest use of **ACRYFILL SOFT 42** from 1 to 5% calculated on the lacquer weight: the leathers treated in this way have a smooth surface with higher resistance to scratches.
