

## ACRYFILL WAX WRLC

### CHEMICAL COMPOSITION

Watery emulsion of acrylic resins and waxes

#### CHARACTERISTICS

<i>Appearance:</i>	<i>white liquid</i>
<i>pH in solution at 10%</i>	<i>7 - 8</i>

### PROPERTIES

**ACRYFILL WAX WRLC** is a watery emulsion of selected waxes and acrylic resins particularly formulated for white effects.

**ACRYFILL WAX WRLC** can be added to the pigment so as to obtain a printable effect, furthermore it has a great repolishing effect. The product, if used at temperature of 140°, is thermo-sensitive so it darkens.
