

BERFAT AL

COMBINATION OF ANIMAL FAT AND SULPHATED NATURAL FATS

CHARACTERISTICS

<i>Appearance:</i>	<i>ivory coloured aste</i>
<i>pH in solution at 10%:</i>	<i>7,5 – 8,5</i>
<i>Active substance:</i>	<i>60 – 65%</i>
<i>Ionic charge:</i>	<i>anionic</i>

PROPERTIES

BERFAT AL is a fatliquor formulated with tallow basis selected and bleached with the scope of obtaining an ideal equilibrium between penetration and fibrillar filling. **BERFAT AL** can be used as sole component in the fatliquoring formula or mixture with other fatliquors, giving to skin a soft touch, full and with a slightly wet surface touch (as cowhide).

Thanks to its characteristics, leather treated with **BERFAT AL** once dry, has a high reactivity to brushing.

USAGE METHOD

It is recommended to use it in proportions that vary from 9 – 18% as the only fatliquor and from 5 – 10% in union with other fatliquors.
