

DIMITROL CPM

COUMPOUND FATLIQUOR

CHEMICAL COMPOSITION

Synergetic blend of retanning and lubricant agent

CHARACTERISTICS

<i>Appearance:</i>	<i>dense brown paste</i>
<i>pH in solution at 10%:</i>	<i>5 - 6</i>
<i>Active substance:</i>	<i>45% about</i>
<i>Ionic charge:</i>	<i>anionic</i>
<i>Resistance to light:</i>	<i>good</i>

PROPERTIES

DIMITROL CPM is a blend of neutralizing, retanning and fatting agents. Gives to leathers a full touch, with a good lubricant effect on fibers. It is designed for use in compact processes where it is used alone in ratio 18-20% calculated on the shaved weight without neutralizing the leathers.

DIMITROL CPM is used for footwear and upholstery.
